Judgement Day is coming.

On June 3, California voters will determine the fate of Proposition 9 — Jarvis II. If passed, it would provide for an approximately 50 percent cut in state personal income taxes. It would also repeal the business inventory tax, and fully index the state's personal income tax.

Legislation has already been passed eliminating the inventory tax and "indexing" personal income taxes for two years. Jarvis II would simply make these laws constitutional mandates.

Harry Phillips, an MCC economist, explained the concept of "indexing." To index the state personal income tax and "indexing" personal income tax.

"The real work in these forms for the past three years. They were in the art market. Exhibition in The Long Beach Gallery two months ago was the group showdown in Los Angeles. The Mural Art Gallery and in The Space Gallery in L.A. Each figure develops it own personality as I work with it. The materials are natural ingredients of the area and a feeling of locality emerges in an almost mystic way as they grow. These individuals were made from the black clay that was excavated from the foundation of your own new art building. Beside Camp and I saw the black adobe tile of the gallery floor and the black clay from the earth below, it seemed to be a predestined combination.

"People react very differently to the sculptures. Some are moved and some laugh. I'm interested but I don't mind if they respond unfavorably. What they feel in the presence of the work is removed from my purpose in creating them." (Cont. on page 3)
Adding sex to ad sex

By MARGARET WILHELM

I have been seduced. It's not that I am all that seductive, but in my seduction I get to be the seduced and not the seducer. But like in any love affair, there comes a time to stand back and evaluate the relationship.

For example, television is getting bolder and bolder. I still remember the day when my mother stated matter of factly and with great disapproval, "some day they'll be doing IT on television." Of course, we all know what "IT" is, or "you know what it is.

Picture this: A man is standing before the mirror in his bathrobe getting ready for work. His wife is in, throws her arms across his shoulders, grins at their images in the mirror and says, "I'm going to cut your mustard." He responds, "What are you doing, Heavin' in Milk?" She says, "You're what?" She smiles reassuringly and proceeds to explain that she was putting on a different kind of sausage for breakfast.

His relief is obvious.

Then, there are the feminine protection ads. Jeez, does everybody know the names of their tombs? I mean, have you ever heard anybody call their sex? And how in the world does one do such a thing except the old fashioned way? Naturally, picking his nose, passing gas, bloodshot eyes, sweating profusely... I'm sure the list could go on.

Dr. Heavin' in Milk had a desire to change the meaning behind their slogan. How it came about, we'll never know. Dr. Heavin' in Milk is a very private person.

On campus, however, I find that students just don't get it. They are completely ignorant of the meaning behind the slogan. Some do.,. but I would venture to guess that most don't.

I suppose, though, my anger would be more fittingly directed at the students at large. After all, they are the group that makes up the customer base for their drug store, house, and drug store. Without them, how could they make it into the drug store.

We've got a lot to consider. If you're not a "Pepper," you're not a numero uno. And the Coca Cola ads offer you an unbridled thrill. So it's almost American not to belong to the Pepsi Generation.

That wouldn't be so bad if there wasn't the feeling that the companies were doing it just plain to make money. Not to mention, the alkaline was a complete waste of time.

Long story short, I would advise the students at large to lose the slogan. It's not going to sell anything. But it will be much more interesting in advancing their standing with minimal effort, rather than with the slogan that they have used. Of course, this is advantageous to the to the administration. God forbid that the students should get on with an examination of problem areas on this campus (chaos). I suppose I should shut up now. Probably none of you are listening.Certainly not the student government. (Amen.)

Clyde passes and he passes

By JUDITH WEINBERG

In my family there was always harmony down from mother to daughter and from daughter to "a Mother's prayer." It went like this: "I only pray for you to grow up, your children will make you happy as you have made me suffer.

But never, in my wildest fantasy, did I expect to pull it off all alone without the waiting, the pain of separation and the help of the grandchil­ dren.

My youngest daughter, now 23, totally autonomous, living and working in Berkeley, was helpful in putting a lot of grey in my hair and more than a few lines in my brow, as a rather free-spirited adolescent.

But through the years, and in spite of a mild depression and a larger lifestyle gap, we have al­ ways managed to keep our lives interwoven and our lives style and existence on this planet. I believe it.

In addition, large oil companies making a profit at the expense of the earth or their greed or experience heavier restrictions through the government. Another possibility is that we would be without these resources by the turn of the century if we all work together toward a goal of petroleum self-sufficiency. If we feel less usage and the recycling of products, we can avoid permanently upsetting our life style and existence on this planet.

As a result of the sagging oil prices and the increase in the cost of living, many people have decided to live a more modest life style. As a result of the increase in the cost of living, many people have decided to live a more modest life style. As a result of the increase in the cost of living, many people have decided to live a more modest life style. As a result of the increase in the cost of living, many people have decided to live a more modest life style.

The problem with the world

By DAVID MARSHALL

The State of California has established the California Student Loan Program to help students borrow money for college. The state itself does not lend money but guarantees loans made by banks, savings and loans, credit unions, and others. With such a guarantee, most students would have great difficulty in bor­ rowing because they have little or no income and are not college­ teral.

The first student loan under the new program was made in April 1979. Since then, scores of stu­ dents have completed the complicated process of applying their education through the prog­ ram, and the state has committed itself to borrow up to $2,500 per academic year and to students up to $5,000. Although borrowing for your higher education by this method, a loan is also a long­ term investment, with interest paid by the student with interest fees. The Student Aid Commission argues the student to first consider other resources available such as part-time jobs. Applications for the California Guaranteed Student Loan are obtained at the California Financial Aid Office on campus.

By FREDERICK J. CARROLL

As promised some senators did boycott the April 17 meeting. The next day, however, they called arbitrators arbitrary administrative action. At this meeting of the Senate at which no quorum was present, two senators were conducted out of the pro­ cedure of two Masters at Arms. They are supposed to make sure that no one leaves the meeting place. Chuck Dennett also extended the invitation to call the building to give a p.m. in hopes of finding enough senators to get on with business. Thankfully that never happened.

But now what is the meaning of all this? Why the change? In other­ words why did Chuck Dennett and Mark Kellenberger at the hearing the meetings could complete ignorance of the meaning behind the boycott. You see, just before the meeting Chuck broke out in profanity. On his part was written a response to the boycott in which he clearly identified steps to recall the bogus senators. Sensing political trouble.

Excessive use of oil scored

By BERNARD GROSS

The oil crisis is everyone's concern because it is not just a matter of price directly or indirectly. Our world has limited fuel resources which took billions of years to produce, and because of our fuel oriented exist­ ence, we are nowBeyond the years of worth petrol every day.

At this present, unbalanced and rampant expenditures will be without these resources by the turn of the century if we all work together toward a goal of petroleum self sufficiency. If we feel less usage and the recycling of products, we can avoid permanently upsetting our life style and existence on this planet.

We, the public, need to exercise our rights through channels available such as part-time jobs.

The state itself does not lend money but guarantees loans made by banks, savings and loans, credit unions, and others. With such a guarantee, most students would have great difficulty in bor­ rowing because they have little or no income and are not college­ teral.

Jarsive on bites of fish

(Cont. from page 1)

pends the public is convinced the surf is 6 to 8 feet high with a 10-mile-per-hour breeze, and the issue is far from being resolved. The question arises: Will there be a fin in the surf on the north side of the harbor tomorrow? The answer is yes. The surfer's overriding concern is to credit the surfers for the high surf watch. The surfers are not morning people. They need a lot of sleep and their wetsuits are not made of cotton. The wetsuits are made of neoprene, which is a rubber-like material. The wetsuits are made in a variety of colors, including red, blue, and black.

The surfer's basic concern is with the high surf. The surfer's concern with the high surf is with the possibility of a shark attack. The surfer's concern with the shark attack is with the possibility of a shark attack. The surfer's concern with the shark attack is with the possibility of a shark attack. The surfer's concern with the shark attack is with the possibility of a shark attack.
People whose telephones sound different from the phones on TV are fortunate — lately I can’t tell the difference. Each time a phone rings on TV I wake up and jump up to answer it! Then, when I realize my mistake, I sit back on the sofa, grumbling. Why can’t they use a buzz, like in a business office? Of course, a buzz might be confused with a chirp or a coak, and lately I am having trouble with these sounds, also.

There are lots of crickets around my house, but then I hear a chirping from far away, probably from the vacant fields near our tract, and this chirping sounds somewhat like a croaking, reminding me of the toad who lives in my yard. At first, I thought it was a frog from the nearby river, but a friend assured me it was most likely a toad surfacing from the ground because of the heavy rains. It resembles the picture of a toad in my encyclopedia rather than the encyclopedia picture of a frog. (I presume I am seeing the same toad each time.) Once it was in my garage, from which locale it got removed with a stick; another time it was by my front door, where it got its picture taken with flashbulbs. A third time it was in my flower bed in front of the house. I do not know if it croaks (or if any toad croaks) because I have not heard it communicate anything.

I am confused not only by country noises, but also by country creatures. In case a toad does croak, I hope I am not called upon to differentiate between its sound and that of a frog because I have enough trouble with telephone bells.

Lillian Mattes
another way

The figure of a soldier is outlined against the horizon. My rifle is positioned in direct alignment with the figure's midsection. As it moves closer, I place more pressure on the cold trigger. Flashes of light reflect upon the figure and suddenly the face of a young man becomes clear. A feeling of nausea almost wrenches my gut as I stare at the prominent features of this man's face. No longer a shadow against a setting sun, but a living body just as my own. A unique creation with a beating heart and veins full of warm, crimson blood. This can't be right, no matter what they say. I'll let him pass and then I'll find another way to live. But the soldier nears my camouflaged foxhole, as if drawn by some ancient force that has developed from centuries of war.

The battle-scarred surroundings seem to await expectantly the sure outcome of this confrontation. How strange that I wait so long to claim the life that has stumbled into my hidden path. Even the sky seems to stop and watch curiously in bewilderment. The stage is set and the audience awaits the act. But I've been a puppet too long. This is one show I didn't audition for. I lie down and cover myself with overbrush and hope the other guy isn't a good scout. A sudden report of gunfire rings out from the distance, followed by several footsteps. I sit up and peer through the overbrush to find just what I had expected. Just what the field, and sky expected through historic experience: a bloody corpse surrounded by his executioners. In this case, the executioners happen to be my countrymen. But I no longer feel part of a stretch of land called a country. My country was lost in the eyes of the dead soldier. Forever lost with the once flowing heartbeat that so earnestly pumped life.

David Marshall

remembering lois

I see her shining hair
Dark BROWN
With a silver crown under the lamplight,
Eyes cast down
Brows even.
She lifts her head;
The highlights dance in her hair,
But not so her eyes.
They're grave:
They contemplate the child in her lap,
The why-it-is-so,
The whither.
She speaks deliberately,
Her eyes distant
Formulating some observation on infancy,
And in the same tone
She may deliberate the kneading time for bread:
For the basics of life deserve
the same consideration,
Be it bread or birth.

'Twas not always so -
This calm deliberation.
Sometimes some hidden wrath would rise,
Erupt and split the surface.
Propelled by some deep yearning, some frustration
That all does not proceed in ordered fashion.
There are the unpredictables
That will not stand examination.

And how was it for you, dear Lois?
Did you meet it with grave consideration
OF THE WHEREFORE?
Or did you cry out in wrath,
"No, not now — not me!"
I ask the question selfishly,
For how is one to meet untimely death
— and how can it be timely?

indelible traces

Touch.
Feather-fine strokes breathe
from whispering fingers...
"I love you" hides
in the words and
winding lines
of a fingerprint.

Linda West
crack in the cosmic egg

The book, THE CRACK IN THE COSMIC EGG, tells us that there is a state of consciousness beyond our present state but that the only way to attain this state of consciousness is by becoming it. I must confess that had I not previously studied COSMIC CONSCIOUSNESS by Don Juan, Richard M. Bucke, and some of gr asping the meaning behind the MIC EGG. Author Pearce has studied "read" because it knowledge of those books. Pearce has died" instead of "read" because it is obvious that he had a high knowledge of those books. Pearce has 191 listings under "artic­ences" and "owles" and 107 listings in his bibliography. He refers to these listings and books throughout his book. His interpretations are so concise and knowledge­able that is may make the reader's heads spin unless they, too, are as well read.

While I admire Pearce's famil­arly with a wide range of material, I think his quotations de­tract from his main idea. He offers arguments against the pos­sibility of accepting the idea of a crack in the cosmic egg, and points out where other writers have missed this realization. Pearce writes, "In this chapter I hope to show the disparity and narrowness of Russell's view­point, and to suggest that his attack on religion was a case of pot calling kettle black." He also refers to other writers to affirm his own. "But not until my exposure to and fascination with Jung." The way of writing may ruin their relations if not to say, understand the meaning of Eure­ka! illumination. Pearce continues, "So I can onlypleasure the reader in im­mediately, asking him for a bit of faith and water reading through these first pages, until, hopefully, more tangible grounds for under­standing form." To me, he has already explained his meaning on the prior page. I already have my "tangible grounds" before he apologizes for not submitting them, for on the previous page he wrote, "There is a third alter­native in our world of exclusive either-or, but the way out is a way beyond, not a rehashing of ruined ingredients. This is a trans­parent ground" to me.

Pearce writes, "Our reality is influenced by our notions about reality... There is a rela­tion between what we think is out there in the world and what we experience as being out there." These statements are not new to anyone who has read Jesus' Sermon on the Mount with understanding. In other words, if someone wants to understand metamorphosis, conversion, and the Eureka!, there are other books available that explain these pro­cesses in a less complicated way. Pearce devotes an entire chap­ter to Don Juan and Jesus. Don Juan taught with the use of imag­inaries and I recent Pearce making is conversion of the two teachers as well as their teachings. Pearce presents them as being similar. To me, they are vastly different. Jesus taught his followers to turn to a higher source or power within them, but Don Juan in­structed his followers to use drugs to reach this higher con­sciousness. Although Don Juan eventually seemed to reach a higher state of consciousness without drugs, his method is an unnecessary deroué. However, I do highly recom­mend the book THE CRACK IN THE COSMIC EGG. Pearce's very arguments in interpreting works by other writers are worth the reading of the book. I know that Jesus' teachings had been misunderstood to a great extent, but I did not know where or how until reading "One or two com­ments" by Augustine, that final death-knell of Jesus' Way... and "Stuckum remone Jesus' crack in the cosmiceggphblock once-for-all happening? There is no question in my mind but that Pearce has experi­enced metamorphosis or what I call Christ Consciousness." He writes, "Whitman, writes, 'I am ever shutting sunshine out of me felt quietness all along.' This is the green premonish which the function rest, that which we can shape to

book review

what would you say

What would you say if tomorrow has no dreams and all your efforts were useless?

What would you say if life had no meaning and all your intentions were detentions?

All Positives, negatives... and all do's don'ts.

What would you say, if you woke and found no sun, and all the day were dark and no sound could be heard, and all your efforts were useless.

What would you say, if you spoke, And all your words had no meaning, And all your efforts were detentions.

All intentions, positive, negative... and all Do's don'ts.

Patricia Welch

the necklace of life

NOW! It's all I have
in a frozen moment between
birth and death.
NOW! It's the circle connect­ing "NO" and "OW" in which all the yesterdays hold hands with the tomorrows.
Birth is not a choice.
Death marks boldly without invitation.
But NOW is mine...

to do with, and for, and about, as I choose.
NOW + NOW = NOW is a life­time.
NOW = Mine!
They are myriad moments of feeling and happenings, strung like a necklace.
To cha de?
To adorn?
To shine?
In eternity!
The jewels of choice make
NOW the most important moment
of life.
Betty Simm

i hurt

I see no blood, no scar of any kind.
get i hurt.
I cannot locate the ill, or re­member some past sickness,
set i hurt.
I remember not whether i fell or was pushed...
i hurt, i am hurt, dammit i am hurt.
i know not where or why, and
that hurts.

the zoo

Happy the creatures that live in the zoo,
Sleeping and eating with nothing to do.
Never concerned about ethics and manners;
You stare at them, and they stare back at you.
Safe and secure in their spacious enclosures,
Wondering not about who pays the bills.
Each of them having a paid life-care contract,
Even free doctors to care for their ills.

Only the elephants work for a living,
Putting on shows for the people to see;
Alas they'll give you a ride in a howdah.
Man was out of work a few months ago.

Strange and exotic these animals' diets.
Neatly compounded according to scale,
Nothing left out that would add to their comfort,
Everything there that their health would entail.

Some of these animals tend to be loners;
Others are sociable, like to live in a bunch.
Some are herbivorous, some are omnivorous,
Some would just like to have others for lunch.

Animals come from the mountains and deserts,
Jungles and prairies, and even the seas:
Starting with "A"s and concluding with "Z"s.

Into the zoo are a great education;
Animals there you will see by the score.
Antelopes, Bison and Caribous, Dingos,
Elephants, Pheas, Giraffes, and some more;

Hippos and Bees, Jaguars, Kangaroos,
Llamas and Monkeys and Neuts you will find.
Otters and Porcupines, Quetzals and Rhinos,
Seals, Turtles, Unipalates of every kind.

Also Vicunas and fleet-footed Waterbucks,
Ezekiel Vaks and a Zebra or two,
Many more creatures, too many to mention.
Live there in luxury all the year through.

Taxpayers visit this animal kingdom,
Wondering what the beasts do for their keep.
Really they lead lives of purest enjoyment:
Nothing required but to eat, breed, and sleep!
Clifford Gregg

This is the Chariot's second liter­ary supplement. Enjoy the fine art­works and lively writings.
The Chariot will include its next supplement May 20. Why not in­clude your talent? The rules are simple: 1. Submitted short stories must not exceed 500 words; 2. Submitted poems must not ex­ceed 30 lines; and 3. Artworks should no be larger than a standard reading page.

Send type, doublespaced subsi­butes to Patricia Welch, advisor to the literary suppl­ement, through inter­campus mail, or to Steven Gates, Chariot office C-135 no later than May 28.

Be your own hero.
April 25, 1980

WHAT COULD THE ARMY POSSIBLY OFFER A BRIGHT PERSON LIKE YOU?

Drop your guard for a minute.
Even though you’re in a two-year college right now, there are many aspects of the Army you might find very attractive. Maybe even irresistible. See for yourself.

ROTC SCHOLARSHIPS
If you’re thinking of eventually going to a four-year college, it’s not too early to start thinking about an ROTC scholarship.
There are 2-year and even 1-year ROTC scholarships available.
They cover tuition, books, and lab fees. Plus $100 a month living allowance. Naturally, they’re very competitive. Because besides helping you towards your bachelor’s degree, an ROTC scholarship helps you towards the gold bars of an Army Officer. It’s worth looking into.

WINGS & A CHOPPER
With two years of college under your belt, you can get preferential consideration for Warrant Officer Flight Training.
If you pass all the tests and qualify, you’ll go through 40 weeks of rigorous and valuable training.
You’ll earn the distinctive bars of a warrant officer and the silver wings of an Army aviator. You’ll have at least 175 hours of flight instruction, 40 hours with a flight simulator, 4 weeks night qualification, and enough classroom work in aerodynamics, meteorology and aerial navigation to last a lifetime.
The result is a rewarding, responsible and prestigious position as an Army helicopter pilot.

STRIPES FROM THE START
What you’ve learned in college has already earned you a promotion in the Army.

A few years in the Army can help you get not only the money for tuition, but also the maturity to use it wisely.
The Army has a program in which money you save for college is matched two-for-one by the government. Then, if you qualify, generous bonuses are added to that.
So 2 years of service can get you up to $7,400 for college, 3 years up to $12,100, and 4 years up to $14,100. In addition, bonuses up to $3,000 are available for certain 4-year enlistments in selected skills.
Add in all the experience and maturity you can get, and you can see how the Army can send you back to college a richer person in more ways than one.
We hope these Army opportunities have intrigued you as well as surprised you.
Because there is indeed a lot the Army can offer a bright person just like you.
For more information, send the coupon below.

Please tell me more about: □ (2FR) ROTC Scholarships. □ (2WO) Warrant Officer Flight Training. □ (2ST) Stripes to Start. □ (2SS) Army Reserve Bonuses. □ (2PC) Army Educational Benefits.

MT. VERNON, N.Y. 10550

THIS IS THE ARMY

Note: To insure receipt of information requested, all blanks must be completed.

It’s true. If you join the Army with two years of college, you can start two pay grades higher. Instead of being an E-1 with an empty sleeve, you can come in as E-3 with stripes. It means about $60 more a month in your paycheck. And a lot more opportunity in the long run. Since you’ll be literally wearing your education on your sleeve, your talents won’t go unnoticed by your superiors. And starting out right can really help you make the most of the Army.

A BONUS FOR PART-TIME WORK
You can get a $1,500 bonus just for enlisting in some Army Reserve units. Or up to $2,000 in educational benefits.
You also get paid for your Reserve duty. It comes out to about $1,000 a year for 16 hours a month and two weeks annual training.
And there’s a special program that lets you fit your Army Reserve active duty around your school schedule.
It’s something to consider. Because even if you went to a two-year college because it was less expensive than a four-year college, you know by now that it still isn’t cheap.

A CHANCE TO GO ON WITH COLLEGE
If you’re thinking you might even go further with your college education, the Army can help there, too.
Seidel's arm, Fargo's bat keep Spartans on top

By TIM PIETERS

MiraCosta has used the numbers 7 and 6 to help capture its first conference doubleheader victory. While the Padres had actually opened the season with a 7-6 victory, Montanez is the only starting pitcher left on the roster who actually played in the season opener.

Montanez is the only starting pitcher left on the roster who actually played in the season opener.

The new-look Padres have a different look at the top of the rotation. Eric Rassmussen, Gary Lucas, Rick Wise, Steve Mura, John Currier, Merced this year they'll need a starter with a 10-1 record, losing only in the top 3 on the ladder.

Leading the men was the playing of Jack Turner, from El Camino, who was in the top 3 on the ladder.

The only two pitchers besides Seidel and Towers that have seen conference action are Downey and Seidel, who teamed up to take over for an ailing Towers and Seidel.
